

# AKU-30 crop screw

*The standard motor is a low-speed 3kW electric motor. Also, the hydraulic motor is an option. Motor is attached straight to axle with a switch.*

*AKU-crop screws are always made to order and it's length is determined according to use.*

*On the bottom part of the screw can be equipped with different supplements. In the picture there's an accessory, which allows filling the screw by connecting the pipe to screw.*

*In hard conditions there can be added an oiler to the bottom part's bearing.*
